

VU DINH NGHIA HUNG

Unity Developer | Client Engineer

Phone: 0915684515 | Email: dsc.hungvdn@gmail.com | Location: Da Nang, Vietnam

PROFESSIONAL SUMMARY

Dynamic Unity Developer with 4 years of hands-on experience building core gameplay systems, real-time multiplayer logic, and scalable client architecture. Proven track record delivering mechanics for hybrid-casual, puzzle-combat RPG, and 3D action titles. Strong background in building internal developer tools, optimizing engine performance, and integrating complex SDKs. Proactive, fast-adapting engineer eager to leverage modern development workflows and technical depth to build world-class mobile titles.

TECHNICAL SKILLS

- Engines & Frameworks:** Unity (2D/3D, UGUI, Animation Timelines, Physics Engine), Photon Quantum.
- Languages:** C#, C++, Python, Swift, Java, SQL.
- Gameplay Engineering:** State machines, gameplay math & physics, combat logic, puzzle grid algorithms, multiplayer sync.
- Architecture & Tools:** Tool development, SDK integration, performance profiling, Git, CI/CD pipelines, macOS.

PROFESSIONAL EXPERIENCE

Gear Games

Da Nang, Vietnam | Nov 2021 - Present

Infra & Core Engine Engineer (Outsource Projects)

Nov 2024 - Present

- Engine Optimization:** Maintained and optimized core game engine components using C++, resolving underlying stability and memory bottlenecks.
- SDK Debugging:** Investigated and resolved critical bugs across third-party SDKs and core architecture, accelerating deployment cycles.
- Tooling & Automation:** Built automated internal pipelines and developer tooling in Python, Swift, and Java to eliminate human error and reduce team workload.

Client Engineer - Custom Car Racing

Mar 2024 - Nov 2024

- Customization System:** Architected an extensible customization animation timeline system, delivering smooth visual feedback and dynamic vehicle customization.
- UI/UX Finalization:** Partnered with the art and UI/UX team to polish all UI views, optimizing draw calls and runtime responsiveness across varied mobile aspect ratios.
- Feature Delivery:** Translated complex design documents into robust, testable gameplay modules with clean component architecture.

Client Engineer - 3D Casual Project

Aug 2023 - Mar 2024

- Character Controls:** Implemented core character movement, navigation, and custom physics logic to ensure tight, satisfying mobile controls.
- Entity Behaviors:** Engineered behavioral scripts and state transitions for interactive character systems and environmental entities.

Client Engineer - Puzzle Strike & Multiplayer Projects

Nov 2021 - Aug 2023

- Puzzle & Combat Logic:** Built core puzzle-matching and turn-based combat logic in C#, balancing dynamic game rules and edge-case handling.
- Multiplayer Sync:** Implemented deterministic, low-latency multiplayer logic using Photon Quantum for real-time competitive gameplay.
- Asset Integration:** Coordinated end-to-end integration of 2D/3D assets, environment maps, and complex character animation state machines with artists and animators.

Client Engineer Intern

Apr 2021 - Nov 2021

- Rapid Prototyping:** Built and shipped 3 complete game prototypes: a Pixel Art RPG (graduation project), Gold Miner clone, and Flappy Bird clone.
- Core Foundations:** Mastered C#, Unity architecture, Git workflows, and collaborative development standards.

EDUCATION & KEY ACHIEVEMENTS

University of Greenwich Vietnam

2018 - 2022

Bachelor of Information Technology

- Google DSC Lead:** Handpicked and selected by the Google Developers team to lead the Google Developer Student Club chapter, organizing tech workshops and hackathons.

Le Quy Don High School for the Gifted

2015 - 2018

High School Diploma - Specialized in Informatics

- Competitive Awards:** Achieved multiple prestigious city and national awards in Competitive Programming and Science & Technology contests.
